- 17:15-18:00 Coffee Break
- 18:00-19:30 Panel Discussion “Research Careers in Japan: Academia vs. Industry”
- 19:30-20:30 Reception With Light Refreshments

## European Research Days Japan 2022

The European Research Days Japan 2022 are designed as a platform for researchers, innovators, practitioners, and professionals from across Japan to showcase their latest research achievements and explore collaboration and networking opportunities with other participants.

The 2022 edition features three days dedicated to pertinent questions and topics, including

- How Europeans work in Japan and collaborate with Japanese researchers on various topics
- How to become effective science communicators
- How to change a career path - from academia to industry - to realise one's potential

The DAAD Regional Office Tokyo will host the onsite part of the programme at the German Cultural Centre in Akasaka, Tokyo. The event coincides with an exhibition by the German photographer Herlinde Koelbl entitled “Fascination of Science” (17-23 October 2022) that is organized by the DWIH Tokyo (managed by DAAD) and the Deutsche Gesellschaft für Natur- und Völkerkunde Ostasiens (OAG). The exhibition features portraits of some of the most renowned scientists and Nobel Prize winners from all around the world, as well as of promising young researchers. The panel discussion on “Diversity in Science” is part of the exhibition programme and participants of the European Research Days are welcome to join (separate registration necessary).
